

A deterministic chip rehearsal predicts the official score

Since K50 the official score has been the chip rehearsal plus a near-constant offset: mean +0.0067, sd 0.0004 over 15 uploads.

Source: results/official-scores.csv (uploads with a rehearsal; K65a-d were not rehearsed). Rehearsals ran on chips A-H with the upload seed and time target; K70a's chip-E rehearsal is normalised to chip-C speed.
